

How to Control the [Dome] Room: Effective Communication in Public Observing & Outreach

Want to learn how to handle the group of 50 families that show up to public observing during the summer break? Engage the quiet kid at the back of the group? Or communicate your exciting field of study without slides, a blackboard, or the ability to see your audience?

Join us for a **mini-workshop with Dr. Susanne Killian from Graduate Career Services for a short course on communicating science** in the context of the public observing program and general astronomy outreach.

Monday, 09/23/2019

3:00-4:00p @ the Dome Room

(refreshments will be served)
